## PROJECTS

---

**Corner Store** - [github.com/Voldari/corner-store](https://github.com/Voldari/corner-store)

Completed as a final project, this app lets users input what ingredients they gave in their fridge and then suggests to them recipes that can be made with their ingredients. Interacting with web APIs to do recipe prepping/shopping.

**Related tech:** Java, OOP, Kotlin, Android Studio

**Code Abbey** - Not visible on my GitHub as Code Abbey requests solutions not be posted publicly.

This site offers increasingly difficult coding puzzle and challenges that can be solved with almost any language.

I have about 50 of the 200 problems solved in Python and once I finish those I will be resolving in Java.

**Related tech:** Python

**Chicken Game** - [github.com/Voldari/chicken-game](https://github.com/Voldari/chicken-game)

My newest personal project this is a learning exercise in Lua and Love2D. The intended goal will be a management game where the player attempts to make new chickens with different colors and sell their eggs for profit.

**Related tech:** Lua, Love2D

## SKILLS

---
